High Speed roller Doors for industries, commercial applications, airport, cold rooms etc. Make: Efaflex Made in Germany

Dock Leveler/ Hydraulic Loading Systems/ Sectional overhead doors

Heavy duty Industrial Grade roller shutters / High Wind loading/Extrawide Roller shutters Make: AKM Tore Germany and Locally Fabricated

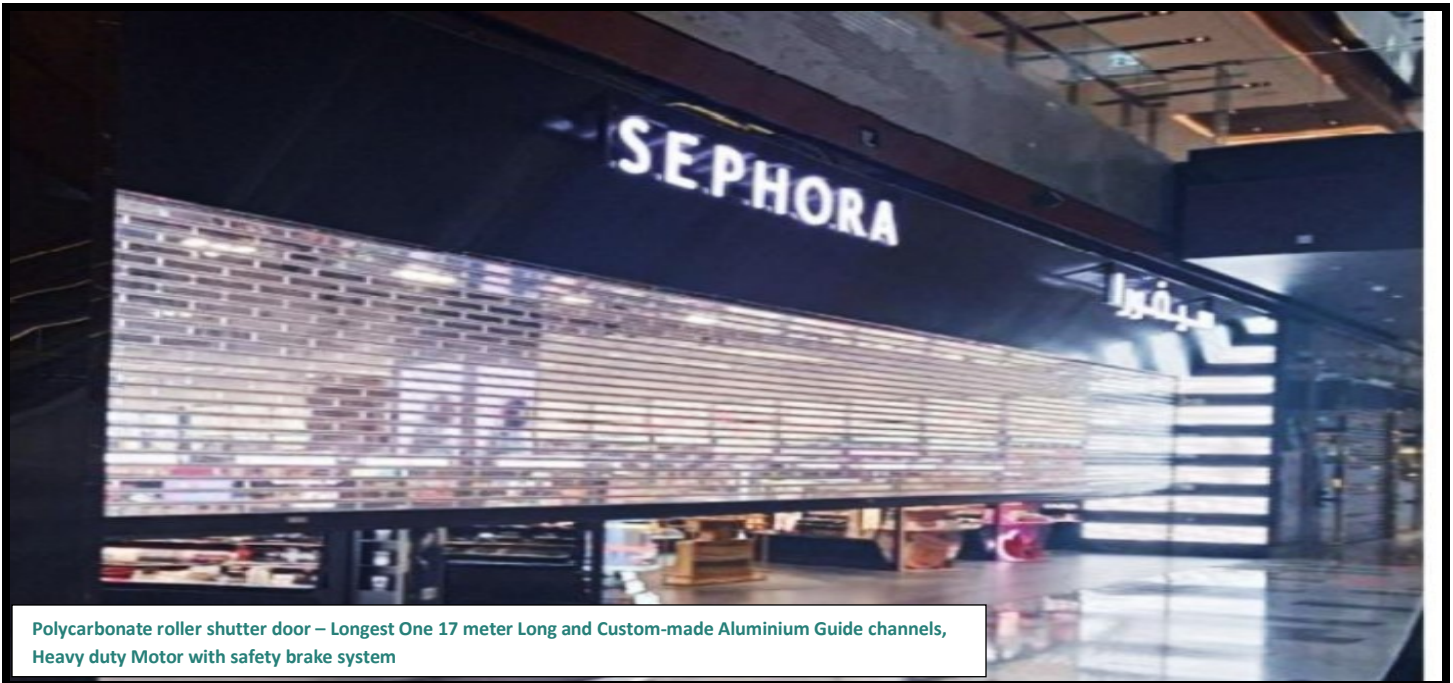

Polycarbonate roller shutters for Shop Fronts, Malls, Garages Etc.

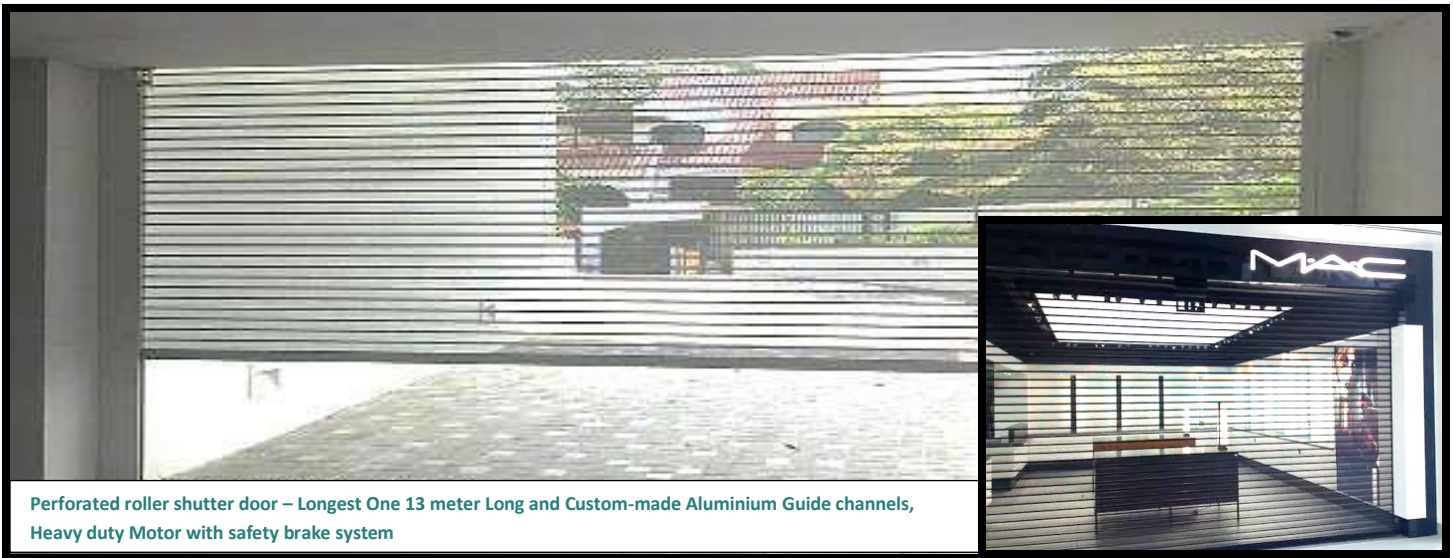

Parking Management, Parking Barriers and access control Automations

Crash tested Anti-Terror Bollards

Polycarbonate roller shutter door – Longest One 17 meter Long and Custom-made Aluminium Guide channels, Heavy duty Motor with safety brake system

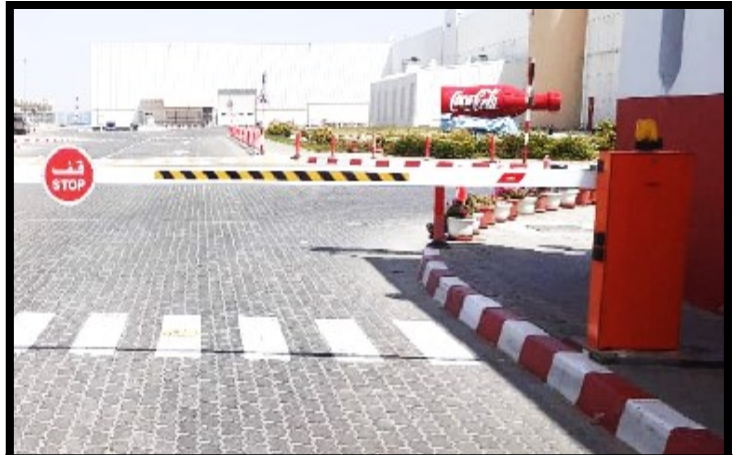

Perforated roller shutter door – Longest One 13 meter Long and Custom-made Aluminium Guide channels, Heavy duty Motor with safety brake system

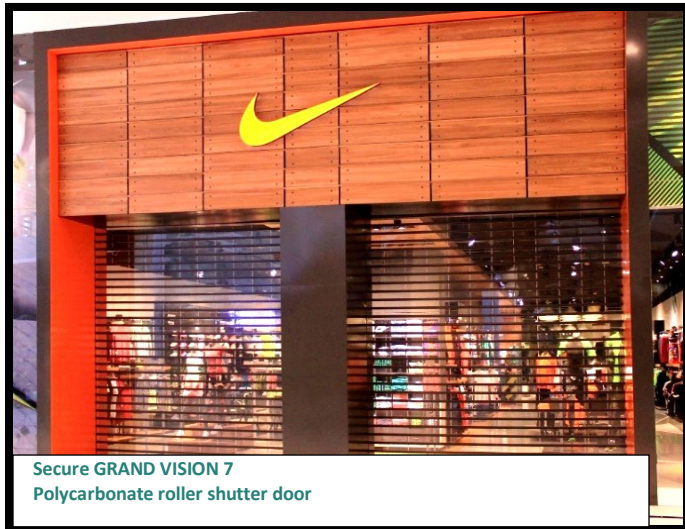

Polycarbonate Lateral Sliding door –channels, Heavy duty Dual Drive Motor with safety locking system

COVA- Crash Gates- Fold Gates

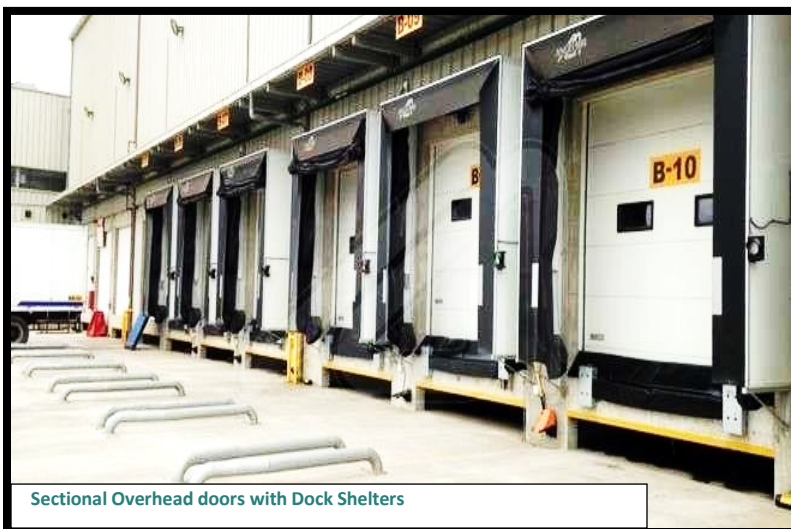

Heavy Duty Gate Barrier "Coca Cola"

Secure GRAND VISION 7
Polycarbonate roller shutter door

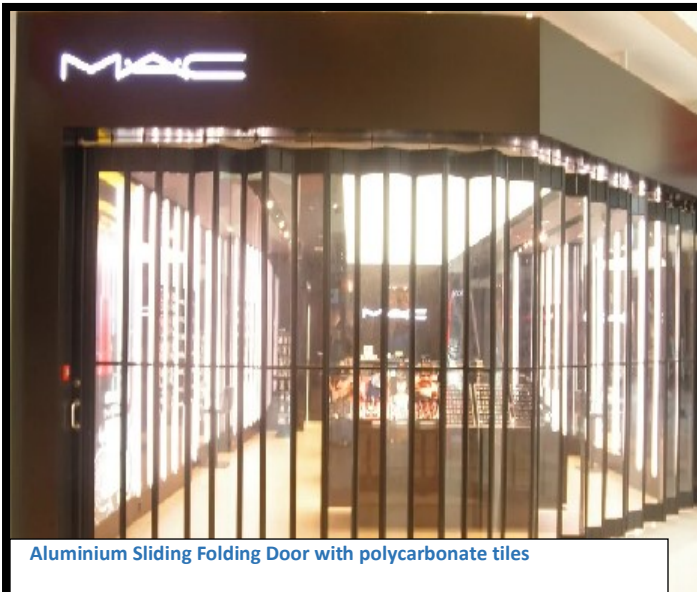

Fire Rated roller shutter (60/90/120Mnt)

Sectional Overhead doors with Dock Shelters

Grill type Roller Shutter Doors with Tubular Motor – SOMFY brand – 5 Years Manufacturer Warranty with manual cranking System

Aluminium Sliding Folding Door with polycarbonate tiles

Aluminium Insulated roller shutter door with Vision Slats

High speed Roll Up Doors

Make: Efaflex

Made in Germany

EFAFLEX is the leading manufacturer of industrial, roll-up and folding doors

A 50-year-old company growing stronger with strong customer base around the world.

Speed

The world's fastest door is made by EFAFLEX. The **EFA-STR®** is a combination of the **spiral-shaped door guidance** and flexible door blade. It achieves an opening speed of up to 4 m/s.

Long service life

EFAFLEX high-speed doors are designed for being used very frequently. Design characteristics such as the patented **spiral technology** or the weightbalance provide for a long service life

Profitability

High-speed doors by EFAFLEX increase the efficiency of every company. High opening speeds minimize the waiting time in front of the doors and thus accelerate the logistic processes.

Energy efficiency

With the **EFA-SST®**, EFAFLEX offers the **first high-speed door worldwide** which is equipped as a standard with thermally separated insulation laths. Thus, insulation values of up to 0.66 W/m²K can be achieved - depending on the size of the door types.

Due to the high speed the transfer of heat exchange inside the building is negligible, hence saves energy.

Safety

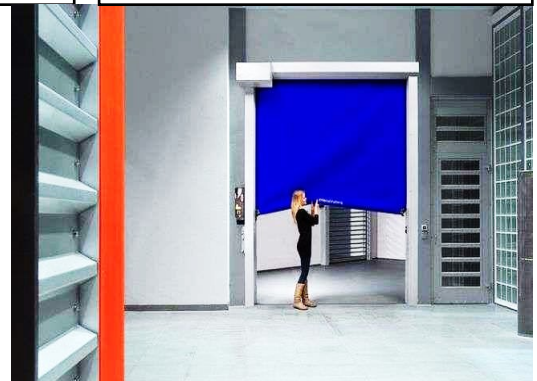

With the door **line light grid EFA-TLG®** and the **laser scanner EFA-SCAN®**, EFAFLEX offers two worldwide unique safety devices for doors.

Global Player

Within just a short period of time, **EFAFLEX** has developed into a global company with a worldwide network.

Today, you will always find your professional contact in your proximity - in more than 50 countries on all five continents.

Polycarbonate Roller shutter Doors

Designed by 'Secure' Made up of high-grade material from Bayer of Germany OR Samsung/ Lotte of South Korea which is Processed and assembled at factory in PRC

- 90% Transparency. Highest of any roller shutter
- Strong as Steel. Comparable to 20-gauge steel shutter
- Won't scratch, crack or break under normal use
- Retains its clear transparency for many years
- Virtually silent in operation
- Self-supporting or structural work as option
- Green credentials – 100% recyclable
Ideal for shopping malls

Secure Transparent roller doors are made of top-quality polycarbonate slats and strong extruded aluminum links OR Stainless-steel inserts depends upon model. The material and design offer superior resistance to attack, while the clear links provide almost unobstructed visibility. They are manufactured to suit for any toughest environment. If you want full physical protection for your window displays and stock and require high visibility by 24 hours 365 days after closing time, transparent roller doors should be very good solution for opening to be reviewed even when you closed.

Our Transparent Roller Shutters Doors could be installed into commercial offices, retail outlets, banks, showrooms, Factories, Shops, Offices, Schools, Warehouses and other Public Buildings.

Model Secure Look

Model: Secure Vision

Aluminium/Galvanized Insulated Sectional Overhead Doors

Door Design :	Galvanized steel/Aluminium insulated panels ,Ribbed design
Hardware :	2 inch Galvanized steel :SENDZIMIR system in accordance with UNI EN 10326, UNI EN 10327 e UNI EN 10143 norms
Lifts :	High lift and Or Vertical lift (As Per site condition)
Section Thickness:	40 mm
Insulation:	Density of polyurathene 40+/- 4Kg./m ³ Rigid polyurethane with internal galvanized plate reinforcement
Thermal Value:	Thermal Values (R=16 Ft2hF/Btu, U=0.535 W/m2K)
Thermal Conductivity:	0.023 W/mK aged According to EN 13165:2001 C5 Directive
Track Sysytem:	Industrial Grade Galvenized and Jamb Seals
Weather Seals:	Top and bottom Weather seal
Counterbalance:	Heavy duty industrial grade Springs
Finish of panels:	Imperial White on both sides. (Any other finish @ extra cost)
Motor:	Make : Somfy Made in Italy Voltage Single Phase
Activation:	Push Button Station (Open Stop Close)

Industrial Grade Sectional Overhead doors

Make: Italdoor Made in Italy

Model : Italpanelli

Industrial Grade Heavy Duty Motors

Make: SOMFY/ SOMAR / MARANTEC

Industrial Grade insulated stacking overhead doors

Made in Netherlands

ROLFLEX SEGMENT DOOR TYPE COMPACT

The Compact door is an insulated industrial door. The patented folding mechanism stacks the insulated panels directly above the door opening leaving the roof area free from obstruction.

The universal hardware system offers some great advantages:

- Simple and cost saving architect provisions;
- Lack of intrusion from door into building, no tracks installed on the ceiling;
- Space savings in the direct door area, free to use for furnishing the building;
- No counter balance springs;
- Quick and simple installation;
- No extra steel works to support the door.

Door leaf

The door leaf is composed of insulated aluminum segments with a working height of 610mm and 40mm thickness.

The doors are custom-made into any desired dimension. To suite the door-height we adjust the top panel dimension. The integrated hinges are standard in stainless steel quality finished with a powder coating.

Rubber seals between the panels and surrounding the door leaf insure a weather draft seal.

Colors

For sandwich panels we have a wide range of standard RAL colors: RAL 9016, 9007, 9002, 9006, 7032, 7016, 6005, 5017, 5010 and 3002. Other RAL colors possible on request.

Operation

The Compact door is electrically operated.

Safety and Euro-Norm EN 13 241-1

The doors are marked with the CE-hallmark and are manufactured according to the latest European norms. The standard safety features according EN-12604 and EN 12453 are:

- Fall-save device.
- Cable-tension detection.
- Night and day automatic locking system.

Steel cables with safety factor 6.

- Rails and finger protection.

Drive: Motor 3x400V, 50Hz (RC300)
IP-54, Switch Duration 60%
Side-motor (can be mounted universally on the left or right)
Crank handle

Operation type: Push buttons with light curtain protection

Extra electrical options: LCD monitor

Activation: Magnetic Loop Detector and push Button

Glazing: None

Aluminium/Galvanized Insulated Roller Shutter Doors

Aluminium Non Insulated and Insulated roller shutter doors

Slat pitch :

55 mm pitch, 77mm Pitch, 100mm Pitch, 120mm Pitch

Depends upon the door Width and Height

Slat Thickness

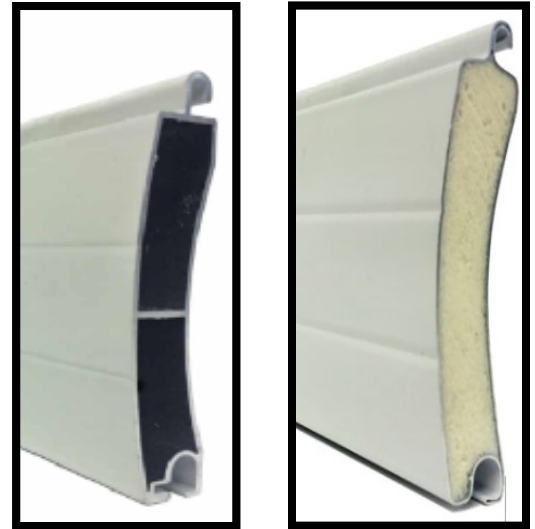

slat thickness :1.15mm ±5% 6063 Grade

Depends upon the door Width and Height

Motor:

Tubular Motor – Make SOMFY Made in France

Side Motor – Make SECURE Made in PRC CE certified

Insulated roller shutters are ideal for areas where energy conservation is of prime concern, such as Warehouses, distribution centres, garages/factories, equipment noise partitioning, paint spray booths, maintenance buildings and storage facilities.

- Fire Rated/ Non-Fire Rated Steel Roller Shutters
- Aluminium Roller Shutters

Solid Slat Roller Shutter Door – Industrial Grade

Roller shutters are manufactured as horizontal slats hinged together. These shutters are either manual operated or electrically operated. Their applications include warehouses, factories, storage applications, malls, shop fronts, stadiums, garages, plant rooms, hospitals etc. All parts are powder coated to selected RAL colors as per the customer's requirements.

The Solid Slat Roller shutter doors are locally roller in our facility in Ajman, using high grad Galvanized steel rolls ranging from 0.8mm to 1.5mm thick.

Robust in design, 75 mm pitch, powder coated to client's color choice.

Manually or electrically operated.

Electrically operated roller shutters are equipped with industrial grade motors customized for our specification with CE certification.

Dock leveller & Loading System

The dock shelters for loading bays from Angel Mir - Portes Bisbal SL are essential to prevent that air, water, gases, insects or dust enter. Also, to protect both workers and goods.

They provide **great energy savings** because the air currents are eliminated and, therefore, losses of temperature in refrigerated facilities are avoided. Thanks to their **strong construction**, they can withstand the usual erosions and impacts of such premises. All the models have been designed to adapt themselves to the vehicles, the goods and the requirements of each industry.

Anti-Terror Bollards & K-12 Crash tested Gate

Palace in Abu Dhabi

They provide **great energy savings** because the air currents are eliminated and, therefore, losses of temperature in refrigerated facilities are avoided. Thanks to their **strong construction**, they can withstand the usual erosions and impacts of such premises. All the models have been designed to adapt themselves to the vehicles, the goods and the requirements of each industry.

COVA- Crash Gates- Fold Gates

A leading manufacturer of high-quality perimeter security equipment including 'crash rated' products to prevent hostile vehicle attacks when being used as a weapon.

From UK manufacturing facility, Cova Security Gates design and manufacture bi-folding trackless gates, sliding cantilevered gates, shallow mount road blockers, full depth road blockers, static bollards, rising bollards, barriers and pedestrian gates. We are leaders in our field of hostile vehicle mitigation.

The PAS 68 2010 compliant crash rated range has been developed to counter vehicle borne explosive attacks to critical national infrastructure, as well as protect other high profile sites and businesses, comprising bi-folding trackless gates –tested to 40mph and 50mph, sliding cantilevered gates, shallow depth road blockers, full depth road blockers tested to 50mph, static bollards, rising bollards and barriers.

Crash Tested Gates
